

Solutions Developer

As a solutions developer, you will work closely with the Vice President of Web & IT to ensure our technology infrastructure is able to meet the needs of a growing organization. You will need to implement software solutions to automate various processes within the organization. When presented with problems that our team is facing, we must engineer a solution to enable the team to execute to their fullest extent.

Core Responsibilities

- Develop solutions for various needs within the organizations
- Tie various technologies to provide more seamless operations
- Build custom solutions, word press plugins, scripts and automation tools
 - Knowledge of PHP/Linux/Web Development Required

Commitment

- ~1-5 hours per week.
- Mandatory attendance at monthly and quarterly management meetings
- Mandatory attendance at Start Proud events and initiatives throughout the year.

Reports to

- Vice President of Web and IT
